English: Fluent
German: Basic knowledge

MAIN INTERESTS

Mountain related activities: climbing (rock and ice), spelunking, canyoning, and alpinism
Active Rescuer Team Leader within the SSF (Secours Speleo Francais)

Vision of EUFANET's future:

EUFANET needs to take a more central place in knowledge and expertise sharing among European actors.

This should be an European forum where you can connect several players for a given project.

EUFANET may need to promote Failure Analysis as a key knowledge within the Semiconductor Industry and at institutionnel level.

Keeping it as a light structure with punctual events seems a good fit for today.

I wish we can promote the network to more players even small in FA field like Fabless companies, MEMS startup, etc...
